20% Downside.....

or 20% Upside

Did it start out bleak and look bleaker?

Or did you oversubscribe early and gleefully
count your money as the market plummeted
ever further?

Ah, yes. Mr GigglesWorth remembers
walking the fields late last year, listening to
the circling rumors that danced in the
autumnal air.

They said, it would be a bad year, a year to
minimize losses.

Who said?
What? Where? When?
If only you'd listened.

A penny wise and a pound foolish, while the
price of corn dropped a good buck over the
course of 2015.

20% Up or Down...

Could of. Should of. Would of.

Somebody made a lot of money.

Did you?

Although Mr GigglesWorth is more than happy to offer advice, our advice is not to take it. Word to the wise: This is a joke and not to be taken seriously.
