*is my resume*

## **Real World Experience**

25 Years Selling Specialty Construction Materials For the Same Company!

That's Loyalty!

That's Experience!

That's Dependability!

That's an Old Man!

Who Knows How to Manage Projects!

Who Knows How to Run a Small Business!

Who Knows How the Real World Operates!

The Man Knows Business!

## **Self-Taught Programmer**

Who Pounds Out Code. Gets the Job Done. Makes Design Decisions. Researches Unique Solutions. Doesn't Waste Time on Fluff. Knows How to Trouble Shoot, Debug, Set Up a Programming Environment, and Cut His Losses Short by Eliminating Dead Ends Early & Often (like my studies in Scheme, just as a for instance).

## **The Basics of Python Syntax Down Cold.**

How about color shifting an image on the fly? Inserting a custom watermark without utilizing a readymade function? Or crafting a rainbow gradient background from the ground up. Yeah, I think I could do all that on a whiteboard from memory.

*He said when he first wrote this resume many long years ago, so we'll see...*

## **Python - JavaScript - HTML**

*- or just plain prose -*

I write for a hobby. I'm creative. I can hold the plot points for a story in my head. Notes? Who needs story notes? Now, an agent, that is something I could really use...

## **BS in Psychology**

*- oh, I can BS, alright -*

Certificates in Electronics and Addictions Studies

Wavelets. Histograms of Gradients. Edge Detectors. ABM's. Genetic Algorithms.

Not a PhD, but I like to think I'd make a pretty good tech for one.
